FINANCIAL INSTRUMENTS FOR THE FUTURE CFP

Pavel Salz

High Level Conference on the future of the CFP
Noordwijk, 9-11 March 2011
## CONTEXT OF FUTURE CFP

<table>
<thead>
<tr>
<th>Economy</th>
<th>Credit crisis</th>
</tr>

<tr>
<td></td>
<td>sustainability of marine environment</td>
</tr>
<tr>
<td>CFP 2013</td>
<td>Green Paper: 5 failings + 9 improvement</td>
</tr>
</tbody>
</table>
Top priority (?): Focus on sustainability
  ~ General: human impact on marine environment
  ~ Specific: sustainability of commercial stocks

Lower priority (?): small scale fisheries, processing, aquaculture, inland fishing, regions, trade and markets.
SUSTAINABILITY DILEMMAS

Choice in time
   Short term versus long term interests
Solution
   Public protection of future generations
      (restrictions on use of resource)

Choice between groups
   Tragedy of the commons
Solution
   Cooperative arrangements among producers
      (division of available resource)

Choice between men and nature
   Market versus existence value
Solution
   Political decision process
FUTURE ‘EFF’ - PRINCIPLES

Principles
• Focus on ‘raison d’être’ of CFP – exploitation of common resource
• Pro-active - addressing causes, not consequences
• Process oriented – addressing behaviour of operators, not structure/size of the sector
• Creating conditions, not benefiting individuals
• Focus on public tasks (environment), not industry viability

Objective
• Proportionate support of CFP objectives and priorities.
FUTURE ‘EFF’- MEASURES

Role
• Create market consistent incentives to promote and strengthen environmentally sustainable behaviour.

Measures
• Promotion of cooperation / Industry assuming responsibility
• Strengthening industry knowledge and its input to scientific assessment
• Introduction of new technologies (reduction of discards and other impacts)
• Facilitating markets for production rights (ITRs)
• Financial engineering instruments
SYNERGY WITH OTHER FUNDS

Fishery measures
- *De minimis*
- 2nd Financial instrument: third countries access, management and control costs, scientific advice and data collection, co-management (RACs, ACFA)
- EAGF: market organization

Integration of EFF and 2nd Financial instrument + refocusing on CFP priorities

Structural funds
- EFRD – to assume regional development
- ESF – to assume socio-economic compensation
Administrative burden

- Ex-ante: Cost of application, evaluation and guidance
- Ex-post: Costs of monitoring, reporting and audit
- Costs incurred by beneficiaries

Suggestions*

- Central electronic repository at national level of information to avoid repetitive reporting from beneficiaries to different authorities
- Thresholds on small projects – differentiation of reporting obligations by project size
- Homogenization of procedures and definitions used under different structural funds.

*High Level Group of Independent Stakeholders on Administrative Burdens on Cohesion Policy
QUESTIONS FOR DISCUSSION

1. What is the nature of the problem to be solved?
2. What is the priority of the future CFP?
3. Which financial incentives can be created to support the CFP priority?
4. What does this imply for the new EFF?
5. Synergies with other funds through coordination or transfer of measures and funds?
6. How can administrative burden be eased?
